The host lobby — share the room code and URL with players on the same Wi-Fi.

How to play

Color Panic is a local-network party reaction game. One laptop hosts the game; players join from their phones on the same Wi-Fi. **Setup**

1. On the **host laptop**, open <http://localhost:3344> and tap **Create Room as Host**.
2. The host screen shows a 4-letter room code and a join URL like <http://192.168.1.42:3344>.
3. On each **phone** (same Wi-Fi), open that join URL, tap **Join Room as Player**, enter the code and a name.
4. Pick a **difficulty** (Easy / Medium / Hard) and a **round count** (3–30).
5. Once everyone is in, host taps **Start Game**. **How a round works**

Every round flashes an instruction (e.g. "Everyone tap RED!") and gives you a small time window (3–9 seconds depending on type & difficulty) to act. Some rounds have a **preview phase** where colors flash before you can tap. **Scoring**

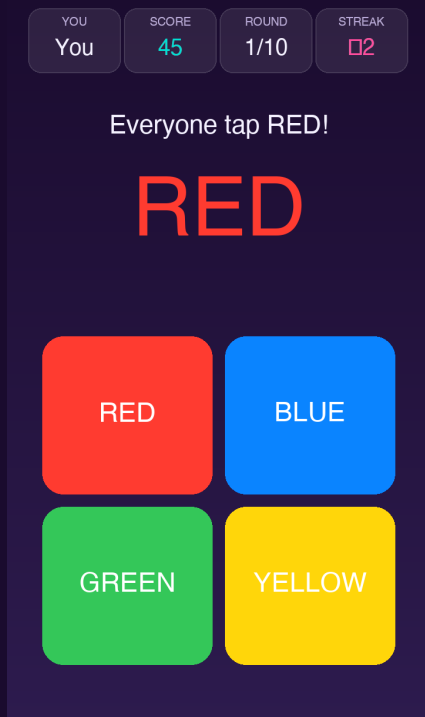

- Correct tap: **+10** (some round types pay more — up to 30)
- Wrong tap: **–5**
- Fastest correct each round: **+5** speed bonus
- 3-in-a-row streak: extra bonus, fire emoji on your card
- No answer: **0 Boss rounds**

Every 5th round is a **Boss Round**. Only the hardest round types appear, the duration is 1.5× longer, and points are **doubled**. Watch for the gold banner. **Difficulties at a glance**

- **Easy** — 8 rounds, gentle pace, simple types only (tap, avoid, opposite, math, last-color, odd-one-out).
- **Medium** — 10 rounds, normal pace, full type mix.
- **Hard** — 12 rounds, fast pace (65% duration), every type including memory & combos.

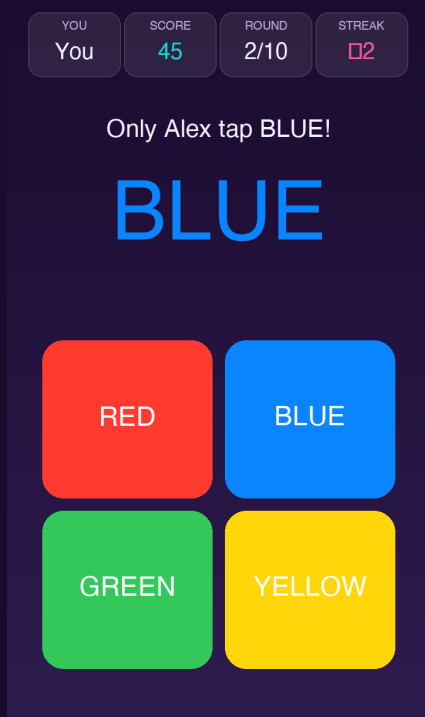

Round types

There are 18 round types plus a Boss-round modifier that triggers every 5 rounds. Each round below shows what the player's phone screen looks like.

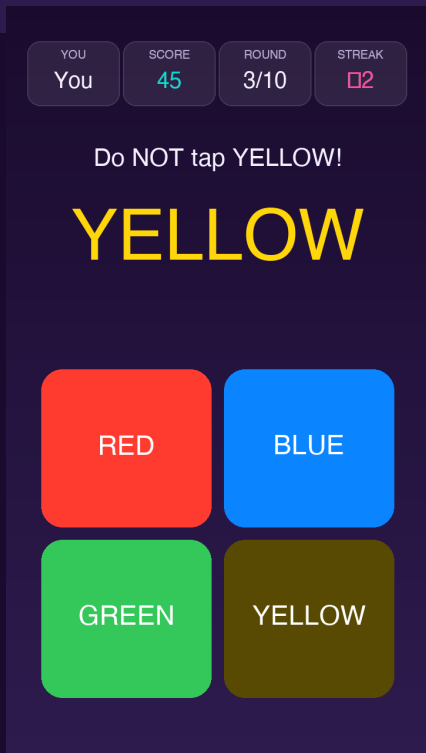

Everyone Tap Color

All players race to tap the named color. Fastest correct tap earns the speed bonus.

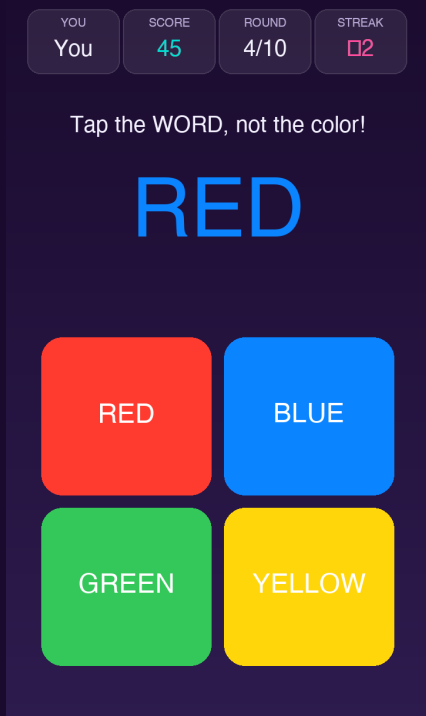

Only Player Tap Color

Only the named player should tap the color. Everyone else must keep their fingers off — any tap from a non-target player counts as wrong.

Avoid Color

Tap any color **except** the one named. The 'forbidden' color visually dims so you don't fumble it.

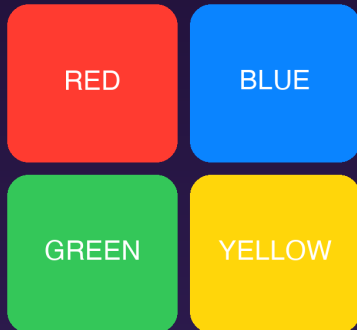

Word vs Color (Stroop)

Stroop-style trap: the screen shows a color word painted in a different color. Ignore the paint — tap what the **word** says.

YOU You	SCORE 45	ROUND 5/10	STREAK 02
------------	-------------	---------------	--------------

Tap the OPPOSITE of RED!

RED

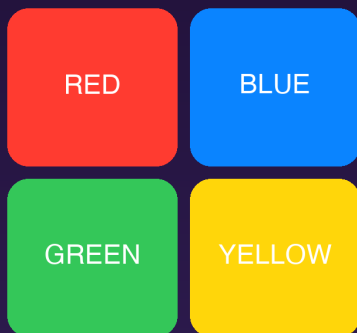

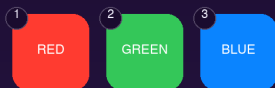

Opposite Color

Tap the opposite of the shown color. Red↔Green, Blue↔Yellow. Think before you tap.

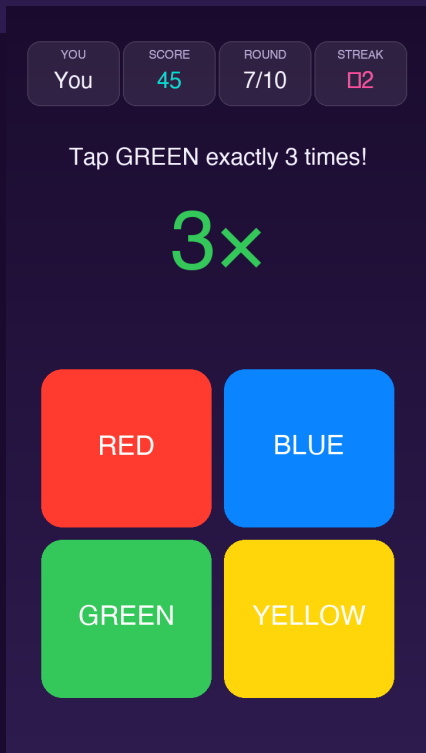

YOU You	SCORE 45	ROUND 6/10	STREAK 02
------------	-------------	---------------	--------------

Tap this sequence in order!

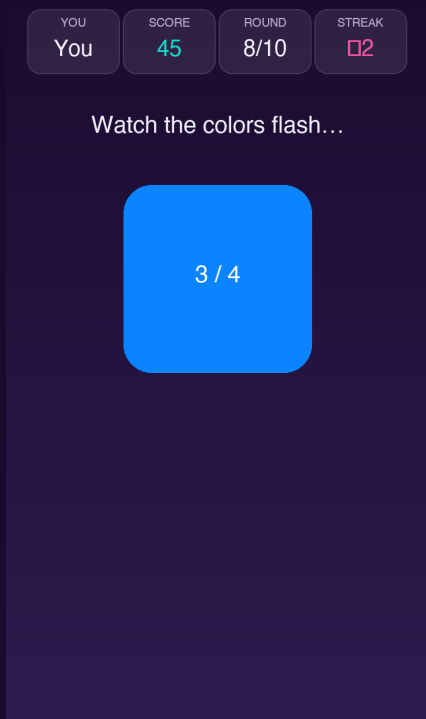

Sequence

A 3-color sequence appears. Tap them in the shown order. Wrong color at any step ends your round.

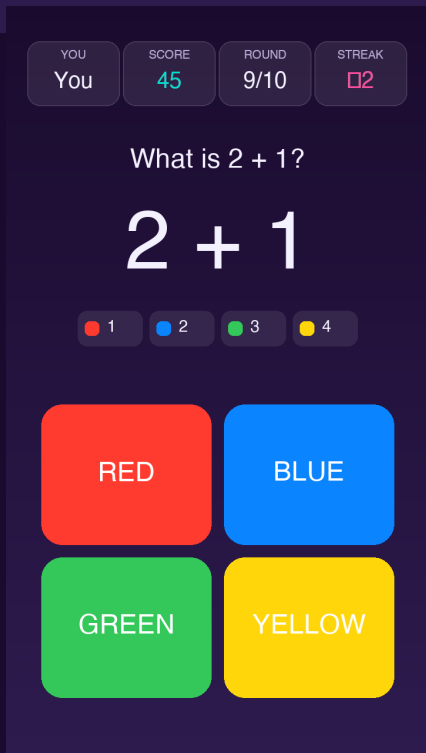

Count Taps

Tap one color *exactly* N times (usually 3 or 4). Over- or under-tap and you miss.

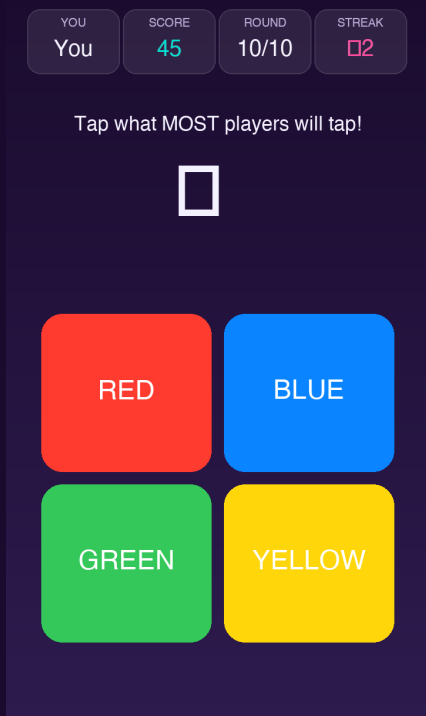

Last Color (flash memory)

A series of colors flashes one at a time. After the flashes end, tap the *last* color you saw.

Color Math

Solve a small math problem (e.g. $2 + 1$). The answer maps to a color via the legend (1=red, 2=blue, 3=green, 4=yellow). Tap the color of the answer.

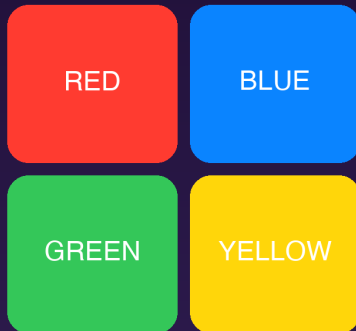

Majority

Tap whichever color you think **MOST** other players will tap. Scoring is deferred until the room reveals the tally — you win if you sided with the crowd.

YOU You	SCORE 45	ROUND 11/10	STREAK 02
------------	-------------	----------------	--------------

Tap what FEWEST players will tap!

Minority

Tap whichever color you think FEWEST other players will tap. You win for picking the least-popular color.

YOU You	SCORE 45	ROUND 12/10	STREAK 02
------------	-------------	----------------	--------------

Memorize this sequence!

Memory Sequence (5)

A 5-color sequence flashes briefly. After it disappears, recall and tap the sequence in order. Worth big points (30+).

YOU	SCORE	ROUND	STREAK
You	45	13/10	2

Wait, THEN tap GREEN!

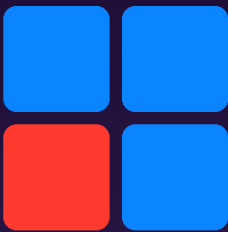

2

Don't Tap Until

A 'wait' period plays first. Tap too early and you lose. After the countdown ends, tap the named color as fast as you can.

YOU	SCORE	ROUND	STREAK
You	45	14/10	2

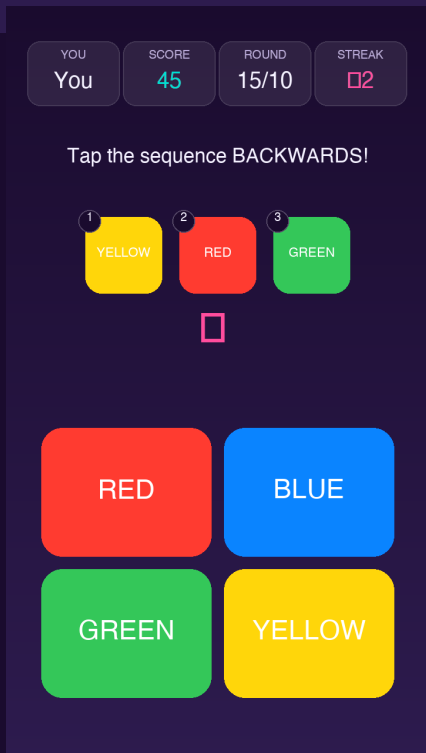

Find the ODD one out!

RED	BLUE
GREEN	YELLOW

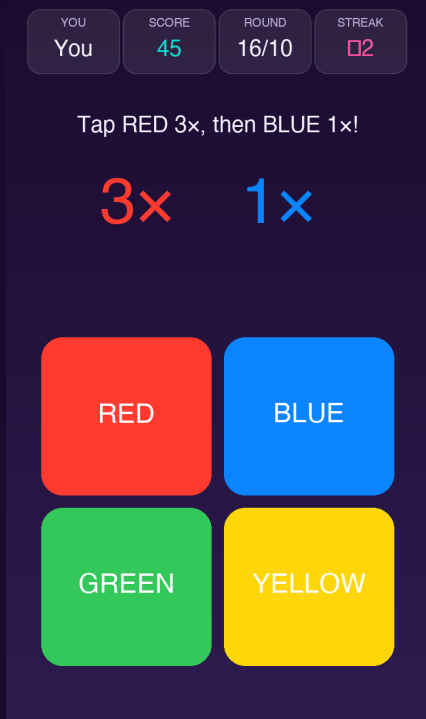

Odd One Out

Four squares appear — three share one color, one is different. Tap the color of the odd-one-out.

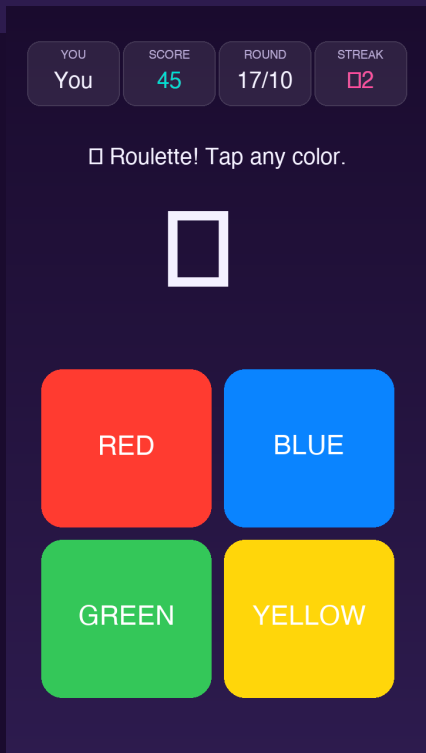

Reverse Order

A 3-color sequence shows. Tap it in REVERSE order. Worth bonus points.

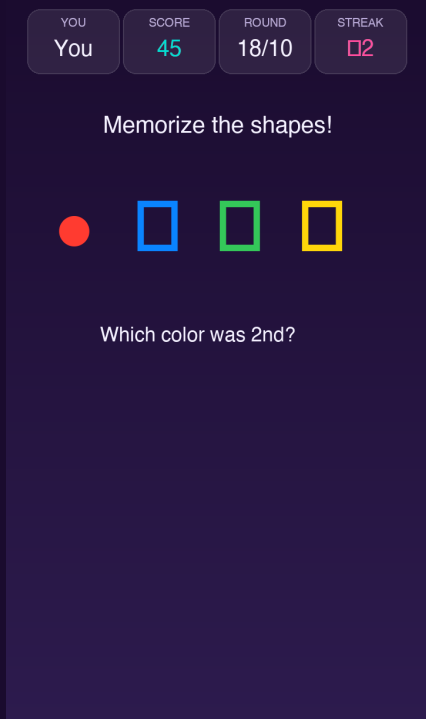

Color Number Combo

A two-phase combo, e.g. 'Tap RED 3x, then BLUE 1x'. Complete phase A first, then phase B. Any wrong color ends your round.

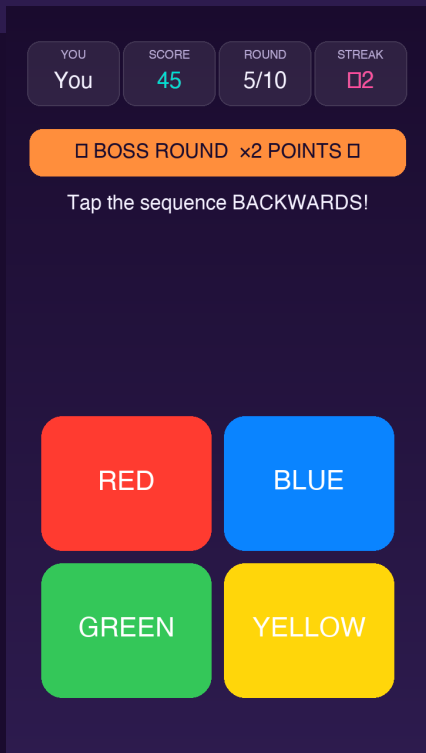

Roulette

Pure chance. Tap any color; the winning color is rolled randomly afterward. Lucky picks score, the rest don't.

Drawing (shape memory)

Four shapes in different colors flash briefly. After they vanish, the game asks 'what color was the Nth shape?' Tap that color.

Boss Round (×2 points)

Every 5th round is a Boss Round: harder round types only, with ×2 points and a longer duration. Big swings in the leaderboard.

Tips for hosting

- **Same Wi-Fi.** Phones must be on the same network as the host laptop. Guest networks and VLANs often block this.
- **Firewall.** On first run, allow Node.js through your firewall.
- **VPN off.** VPNs frequently break LAN routing.
- **Hotspot.** Corporate/hotel Wi-Fi often won't let phones reach the laptop. Use a personal hotspot.
- **Group size.** Most fun with 3–8 players. Solo works but Majority/Minority rounds need a crowd.
- **Difficulty.** Start everyone on Medium; ramp to Hard once people know the round types.
